

SUPPLEMENTAL NOTICE TO PRESERVE ALL POTENTIALLY RELEVANT EVIDENCE

On July 6, 2026, after filing my Motion to Dismiss or, in the Alternative, for Stay Pending Proper Service, I spoke in person with the responding law enforcement officer concerning the events at issue in this matter.

During that conversation, I specifically asked the officer whether law enforcement had checked whether the Domestic No Contact Order (DNCO) applied to my children before I left the residence. The officer answered yes, confirming that such a check was made.

I also asked whether his body-worn camera was recording during the relevant events. The officer confirmed that his body-worn camera was operating during the relevant interactions.

Because this matter is now pending before the Court, I request the immediate preservation of all potentially relevant evidence relating to the events involving law enforcement, Human Services/HHS, county personnel, and any other involved agencies or individuals.

This preservation request includes, but is not limited to:

- All body-worn camera recordings, audio recordings, video recordings, and associated metadata;
- All squad car, vehicle, dash camera, in-car recording systems, and other mobile recording devices;
- All dispatch recordings, 911 calls, CAD logs, call notes, incident logs, and communications;
- All reports, supplemental reports, field notes, officer notes, investigative notes, and records created by any involved official;
- All text messages, emails, electronic communications, instant messages, and other written communications between law enforcement, HHS, county employees, attorneys, supervisors, and involved parties;
- All internal HHS communications, case notes, contact logs, assessments, documentation, and electronic records concerning this matter;
- All photographs, videos, recordings, screenshots, attachments, and digital files;
- All computer records, database entries, audit trails, access logs, and electronic metadata showing creation, modification, review, or transmission of records;
- All backups, archived copies, cloud-stored records, server records, retention copies, and disaster-recovery copies of potentially relevant evidence;
- Any documents, notes, recordings, or communications concerning the DNCO and whether it applied to my children;
- Any records concerning the emergency hold, removal, placement, safety assessment, medical requests, testing requests, or decisions made during the events at issue.

The evidence identified above may contain information directly relevant to the issues presently before the Court, including:

- Whether the DNCO was properly reviewed and interpreted;
- Representations made to me before I left the residence;
- My objection to the requested urinalysis;
- The timeline and sequence of events leading to the emergency hold;
- The actions, decisions, and communications of all officials involved;

- Whether required procedures were followed.

I request that all potentially relevant evidence be preserved and that no such evidence be deleted, overwritten, altered, modified, destroyed, or allowed to expire through routine retention practices.

This notice is intended to place all involved parties and agencies on notice that the above-described materials may be material evidence in this matter and any related proceedings. Preservation should include all original files and all available backup or archived versions.

Respectfully submitted,

James Chapman
